

Take to the clouds

With virtually limitless possibilities of Microsoft's Azure cloud with our data centre to Azure migration services.

Transforming your business to a cloud-based model provides you with an agile, demand driven technology strategy that adapts with your business, no more large capital expenditure and capacity planning.

COMIT's cloud transformation service ensures a speedy, transparent and carefree end-to-end migration of existing systems to the cloud.

Using comprehensive discovery tools and leveraging years of infrastructure expertise, we can identify system and interdependencies to effectively assess, plan and execute complete end-to-end migration projects, minimising costs and mitigating risk.

Why customers use COMIT cloud transformation

This at-a-glance box

- Care-Free end to end migration
- Priced per VM to allow for easy budgeting and costing
- Business transparent migrations
- Structured methodology to ensure accurate discovery, migration and project reporting

Service Offering

- End to End migration of on premise to Azure cloud
- Per VM pricing
- Hardware agnostic
- Cloud architecture design

Our Methodology

- Explore
- Architect
- Plan
- Simulate & Test
- Execute & test
- Support, Monitoring & Optimization

Our value to you

- Carefree migration
- Microsoft validated designs
- Experienced engineers
- Diligent project managers
- Tried and tested methodology

Our approach

Discovery workshop – we will assess your VMWare, Hyper-V, Oracle, Citrix or Hardware Infrastructure to discover all servers and applications and ensure your cloud readiness

Costs Assessment – Our discovery workshops will assess your current server resource consumption and match that to Azure, providing a consumption estimate based on your current needs

Design – By using Microsoft validated designs and reference architecture we will design the most optimal Azure based cloud infrastructure, taking into account your business requirements and budgets. Security, Scalability and redundancy will be by design.

Planning, Simulating and Executing – Our team of project managers and engineers will provide a full migration plan, ensuring a transparent and carefree migration, with full status and progress reporting.

Monitoring – Security Analytics, Alerts and performance monitoring are all built-in to our solutions, to help you proactively react to any situation. On going cost optimization of resources

Training – Once your migrated we'll train you, ensuring you make the most of your cloud investment

Includes

- Technical workshops to assess current infrastructure, document systems and topology
- Design of Azure side architecture
- Project management and scheduling of migration around business needed.
- On going monitoring, support and cost optimization.

Our 6 Step Methodology

Tangible Benefits / Desired Outcomes

- Cost Savings – Pay for what you consume
- Per VM Migration Pricing
- Elastic and Scalable to your growing business needs
- Care-Free Migration – end to end service
- Pro-active monitoring and support

Why COMIT ?

Our professional services team are experts across the entire information technology landscape, including strategy, implementation, maintenance, optimisation alongside tried and tested project management methods and IT methodologies.
